+91 6382043976

Bangalore - India

PROFESSIONAL SUMMARY

Senior Java Full Stack Engineer with 4+ years of experience building scalable enterprise applications using Angular and Spring Boot. Strong expertise in microservices architecture, RESTful API development, and performance optimization. Proven ability to design modular, maintainable systems and deliver production-grade solutions in Agile environments.

EXPERIENCE

Software Engineer - Full Stack

Bayer CropScience Pvt Ltd

Dec 2025 - Present Bangalore, India

- Developed scalable Angular UI components, improving user performance and reducing load time by 28
- Built REST APIs using Spring Boot for dynamic UI generation workflows
- Worked on enterprise-scale applications handling high-volume data processing and real-time UI interactions
- Improved system performance and responsiveness through optimized API design

Lead Engineer - Full Stack Developer

HCLTech Pvt Ltd

Mar 2025 - Dec 2025 Bangalore, India

- Developed enterprise applications using Angular and Spring Boot
- Designed RESTful APIs and integrated frontend with backend services
- Led development efforts and ensured code quality through reviews and best practices
- Worked with PostgreSQL, Docker, and CI/CD pipelines for deployment

Development Engineer - Fullstack Developer

ReBIT (Reserve Bank Information Technology)

Dec 2023 - Feb 2025 Bangalore, India

- Developed responsive UI using Angular with unit testing (Jasmine, Karma)
- Followed clean architecture principles and layered design for scalable backend services
- Improved application performance and resolved backend issues

Early Career Experience

Wolken Software, Ninjacart

2022 - 2023

- Worked on Angular-based UI development, bug fixing, and feature enhancements.
- Built reusable components and integrated APIs in real-world applications.

TECHNICAL SKILLS

- Languages:** Java, TypeScript, SQL
- Frontend:** Angular (v8-v20), RxJS
- Backend:** Spring Boot, Spring MVC, Spring Data JPA
- Database:** PostgreSQL, MySQL
- Tools & Practices:** Git, Docker, CI/CD, JIRA

EDUCATION

M.Sc. (Physics) - 77.2%

University of Madras

July 2011

B.Sc. (Physics) - 82.0%

University of Madras

July 2009

PROJECTS

Master Data Management System (ReBIT)

- Designed and implemented core modules using TDD, improving system reliability

NGCB (ReBIT)

- Designed and developed full-stack modules using Angular and Spring Boot
- Implemented REST APIs for data processing and UI integration
- Followed TDD approach to improve reliability and maintainability.

CORE COMPETENCIES

- Data Structures Algorithms
- System Design Basics
- REST API Design
- Debugging Performance Optimization
